

Workshop on Supply Chain Management for Pharma, Hospitals & Medical Appliances Sector

Supply Chain
Management

12-13 August 2014

9:00am – 5:00pm

Venue: CEE@IBA, Karachi

OVERVIEW

The pharmaceutical industry is in turmoil and undergoing unprecedented transformation.

In the era of the highly profitable mass-market blockbusters, Big Pharma could afford lots of inefficiencies along its value chain. These times are gone and pressure on costs is increasingly intense in the pharmaceutical world. Traditionally, pharmaceutical companies were vertically-integrated fully. But, as we are in pervasive search for efficiency and savings, the industry is externalizing many of its functions and “disintegrating” its vertical model. In this highly interactive workshop, we will focus on moving from a buyer-seller relationship, to a strategic partner relationship with key suppliers and vendors. This involves recognizing and applying good practices when engaging with and managing suppliers, drawing on a variety of strategic approaches and complying with GMP, ICH Guidelines, GDP, FDA, EMEA, WHO and Canadian transportation guidelines and applicable international rules and regulations. Despite countless politico-socio-economic odds Pakistan pharmaceutical industry has been growing at very fast rate. Although Pharma market growth is steady there are numerous challenges such as total governmental price control, heavy dependence on imported raw and packaging material, rapid devaluation of rupees against major currencies, increasing cost of man-power, no acknowledgement of process quality management, threat of import of low cost medicinal agents from neighboring countries. No operational excellence can be possible with effective and efficient supply chain.

PARTICIPANTS' PROFILE

- Supply Chain Managers,
- Heads of Production,
- Logistics Managers,
- Production Managers and
