

# Analysis of Financial Statements

Aug 19-Sep 15 , 2015 | 6:30 - 8:30 pm | Wed & Fri

This course has been designed to facilitate analytical assessment of financial statements. Aim of the course is to highlight various aspects of financial statements which have to be taken in to consideration while analyzing numbers. This course has been segmented into three broad categories in order to cover various aspects of financial analysis. Interpretations of ratios are always interrelated. Therefore, appropriate dissection of the ratios is very important which can be helpful in due diligence, performance analysis, credit base analysis, investors analysis, assessment of future outlook, cash cycle assessment in consideration to budgetary forecast, etc. After attending this course, participants will be able to assess various aspects of financial analysis against small amount of investment.
