May 24, 2015 - 9:00am – 5:00pm

Module 2

May 24, 2015 - 9:00am – 5:00pm

May 25, 2015 - 10:00am – 5:30pm

Venue: CEE@IBA, Karachi

OVERVIEW

Supply chain optimization is an emerging focus in the manufacturing industry. SAP has powerful Supply Chain Applications (ERP and SCM) that cater for the needs of manufacturing industry in the modern business world. Be it a process oriented industry or discrete manufacturing, make-to-order or make-to-stock strategies, SAP provides variety of solutions catering for the individual needs.

The workshops are targeted for providing a basic understanding of the architecture and functioning of the Materials Management, Production Planning and Supply Chain functionalities within SAP ERP. It is a short course divided over two level workshops. Level one covers the fundamentals of materials management and production planning in SAP ERP. Level two concerns the supply chain planning in manufacturing scenarios. Workshops shall be conducted in computer labs enabling full hands-on SAP with supporting exercises taken directly from standard materials as well as developed especially for these workshops.

Who Should Attend

Supply Chain Executives, to explore business processes delivered by SAP ERP

Professionals working in Materials Management and Production Planning

Accounting Professionals to understand business processes and their integration in Accounting

All others interested in exploring SAP Materials Management,

Production Planning and Supply Chain functionalities in SAP ERP

PREREQUISITES

Basic knowledge of business processes in general like procurements, sales etc. Accounting knowledge is preferred though not a necessary requirement
Exposure to SAP GUI is also an added advantage, though not necessarily required
