PROGRAM OVERVIEW

Logistics and transportation are critical enablers of Pakistan's economy, supporting manufacturing, trade, retail, agriculture, and exports. Organizations today face rising expectations around cost efficiency, delivery reliability, infrastructure constraints, and regulatory compliance, making effective logistics and warehouse management a strategic necessity rather than an operational afterthought.

The Diploma in Logistics, Transportation, and Warehouse Management is designed for professionals who seek a structured, practical understanding of logistics operations, enabling them to manage transportation networks, warehouse systems, and distribution activities more effectively in local and regional contexts.

PROGRAM COVERAGE

Key areas covered in the diploma include:

- Overview of Logistics and Transportation in Pakistan
- Transportation Modes, Fleet Management, and Routing
- Warehouse Design, Layout, and Operations
- Inventory Handling and Storage Systems
- Distribution, Last-Mile Delivery, and Service Levels
- Cost Management and Performance Measurement
- Regulatory, Safety, and Compliance Considerations
- Technology and Systems in Logistics Operations

The curriculum reflects local infrastructure realities, regulatory requirements, and operational practices, supported by applied frameworks and regional case discussions.

WHO SHOULD ATTEND

This program is suited for:

- Logistics, transportation, and warehouse managers
- Supply chain and operations professionals
- Professionals working with freight, distribution, and storage
- Entrepreneurs and SME owners managing logistics functions
- Managers preparing for broader operations or supply chain roles

LEARNING OUTCOMES

Upon completion, participants will be able to:

- Manage logistics, transportation, and warehousing operations more effectively
- Improve coordination across transport, storage, and distribution
- Reduce operational costs while maintaining service quality
- Support more reliable and resilient supply chain operations
