Postgraduate Diploma Program (PGD) in

Project Management

Program Overview

Project Management is a structured approach to operationalization of any strategic initiative, or for developing a new product or service, or to bring about improvement in any existing process or system. Project management, traditionally considered as a work-sharing ancillary task, has transformed into a highly sought-after specialization. To cater for this need of specialized project managers a professional diploma program in Project Management is being designed to equip participants with expert skills to manage the Project Management Function.

Mission Statement:

Project Management (PM) professional diploma program (PGD-PM) has been developed to fill the competency gap between existing occasional project managers to highly specialized and dedicated project management experts. This program will transform the participants into Project Management Specialists. We will develop them into life-long learners by providing an environment which is full of rigor and relevance. This will prepare them to deal with existing and future challenges by developing their project management acumen, leadership skill, professional ethics and social sense

TESTIMONIALS

"Well, it was a good experience. This program gave me a wonderful insight about Project Management.

The program is constructed for us in a way that gives the students variety. For example, I Studied "ACCOUNT & FINANCE FOR PROJECT MANAGERS, LEADERSHIP PROJECT ORGANIZATION and ESTABLISHING PROJECT MANAGEMENT OFFICE, apart from other regular project management subjects. Like, Project Feasibility Analysis, Project Planning & Execution, Project Management Information System, Project Quality Management & etc.

The classes were so much interactive, listening to the peers and engaging with the professor, helped me a lot to learn new concepts. I strongly encourage new applicant to enroll in this program, it's really invaluable."

Syed Waqar Uddin
Deputy Manager Projects
Master Motors Ltd.

Program Objectives:

- To develop highly skilled practitioners with an in-depth understanding of the five projects management processes of Initiation, Planning, Execution, Control and Close-out.
- To familiarize the participants with the best practices in evaluating and managing projects (both local and international).
- Establish an understanding of developing and running a company's Portfolio; Project Departments, and Project Management Offices.
- Contribute in a business's strategic planning by understanding the business needs and finding opportunities (projects) to fulfill those needs.
- Develop resources including human resource that can lead a company to transform from Non-Project Driven to Project Driven organizational environment.
- To impart study techniques that will help prepare participants for the International certificate examinations especially PMP®.
- To acquire tools of leadership, problem solving & decision making.

Learning Outcomes:

- Prepare competent Project Managers who are able to evaluate and manage Projects using best practices.
- Establish an understanding of developing and running a company's projects through Portfolio, Project Departments, and Project Management Offices.
- Understand and contribute in a business's strategic planning.
- Develop human resource that can lead a company to transform from Non-Project Driven to Project Driven environment
- Bridge the competency gap and to enhance the professionalism of those involved in the industry by combining academic theory with best practices
