

Workshop on

Supply Chain Management

Unleash the Power of Effective Supply Chain Decisions!

Brains & Guts of Supply
Chain's Decision Making

DATE, TIME & VENUE

-  November 26 to 29, 2024
-  9:00 a.m. to 6:30 p.m.
-  NIBAF, Islamabad

PROGRAM FEE

PKR 120,000 + 5% tax
Residential fees: 15,000 / Night
*Inclusive of course material, IBA certificate,
lunch, refreshments & business networking*

WHO SHOULD ATTEND?

- Senior and mid-level managers and consultants responsible for domestic and international supply chain and logistics systems
- Operations, purchasing, inventory control and transportation managers who want to ensure high customer service levels, low system-wide costs and smooth production with as little inventory as possible
- Managers who want to gain a deeper understanding of the role supply chains play in a company's overall business strategy

PROGRAM OVERVIEW:

Unlock the mysteries of Supply Chains decision making and learn powerful tools to influence actions and impact outcomes. Revolutionize your operations. In this dynamic and collaborative learning environment, you'll learn the latest tools, techniques and models for efficient — and effective — supply chain management.

How and why do Managers make supply chains decisions? Do they lead with their brains or guts, or a combination of the two?

This course helps you make sense of it all with research-driven insights, strategic frameworks, and practical tools. Uncover the fundamental principles of supply chains decision making drawn from supply chain drivers, operations economics, financial footprints, and consumer behavior. Then, learn how to scribble these decision-making forces to drive desired actions and achieve your business goals.

Supply Chain Simulations & Modelling

Taught by leading authorities on management, strategy, marketing and decision sciences, this program offers an interdisciplinary approach to managing supply chains and leading effective operations. Faculty present state-of-the-art models and real-world local case studies on managing facilities, inventories, transportation, information, outsourcing, strategic partnering and more.

You will learn effective strategies for managing logistics and operating complex networks. You'll develop new skills for integrating your supply chain into a coordinated system and learn how to identify supply chain risks and design mitigation strategies. You'll gain practical tools for increasing service levels and reducing costs. And you'll be inspired to redesign your operations for peak performance.
