

Financial Modeling & Business Valuation

April 28-30, 2026

NIBAF, Islamabad

Program Overview

This program offers a comprehensive introduction to modern financial modeling, equipping participants with globally recognized tools and techniques used by financial advisors and industry consultants. With a strong focus on practical application, the course emphasizes structured model-building, real-time problem-solving, and the integration of best practices to ensure accuracy, clarity, and strategic value in financial analysis and reporting.

Participants will gain the confidence to build and interpret models that support informed, data-driven decision-making in diverse business environments.

Course Outline

The course is designed to cover the following key objectives:

- Follow a logical, structured and disciplined approach towards model building
- Build a model from start to finish
- Learn how to translate key financial and commercial aspects into Excel
- Understand how to tailor the outputs of the model and interpret the results
- Learn ways to reduce the incidence of modelling errors

PROGRAM LEARNING OUTCOMES

- Construct a financial model in real time, under the guidance of a seasoned investment professional.
- Identify and incorporate globally accepted best practises pertaining to financial modelling.
- Learn the necessary tool-kit required to prepare decision making dash-boards.
- Discuss business cases with a focus on identifying key value drivers required to understand business mechanics.

Who Should Attend ?

- Professionals using MS Excel.
- Professionals involved in the construction and use of financial models, including budgets, projections, evaluations, cash flows, projects, etc.
- Professionals aspiring to pursue a career in financial advisory.
- Senior executives looking for opportunities to rejuvenate their financial modeling skills.
